Acknowledgements: This work was supported in part by the National Institutes of Health under Grants EB032716 and HL151561. We thank GE HealthCare Technology and Innovation Center for their support.

Conflict of interest: The authors declare no conflicts of interest.

Supplementary Materials: The synthetic CatSim CCTA dataset and clinical CCTA examples used in this study were obtained from a previously published work. Access to these data is governed by the original authors' data-sharing policy and any applicable institutional or data-use restrictions. Code and trained model weights may be made available by the corresponding author upon reasonable request, subject to institutional approval and applicable restrictions.
